

MINISTRY OF DEFENCE · GOVERNMENT OF INDIA

HEADQUARTERS INTEGRATED DEFENCE STAFF | NEW DELHI

DOCUMENT IDENTIFIER: MOD-DOC-2026-OP-TRIDENT

CLASSIFICATION: COSMIC TOP SECRET // AIR-GAPPED DISTRIBUTION ONLY

ISSUING COMMAND: Joint Directorate of Strategic Cyber & Cryptographic Operations

EFFECTIVE DATE: 25 SEPTEMBER 2026 | CRYPTOGRAPHIC VALIDITY: 365 DAYS

SUBJECT: STRATEGIC CONTINGENCY PLAN 'TRIDENT SHIELD' (PHASE IV)

1. OPERATIONAL SITUATION & CONTEXT:

Hostile automated cyber reconnaissance and quantum-assisted algorithmic attacks against regional critical defense infrastructure mandate immediate deployment of post-quantum resilient broadcast encryption frameworks across all Joint Military Operations Command Centers.

2. CRYPTOGRAPHIC GOVERNANCE DIRECTIVE:

All operational orders and tactical plans shall henceforth be distributed under NIST FIPS 203 (ML-KEM-768) key encapsulation and audited via NIST FIPS 204 (ML-DSA-65) post-quantum digital signatures committed to an air-gapped, multi-validator Distributed Ledger Technology (DLT) network.

3. ATTRIBUTION AND NON-REPUDIATION PROTOCOL:

Every individual officer decryption is bound to a forensic, session-unique invisible watermark. In the event of an unauthorized document extraction, screenshot, or digital breach, forensic extraction engines will match the physical and structural artifacts to the officer's non-repudiable signature.

4. DESIGNATED STRATEGIC TARGET NODES:

- Sector Alpha (Naval EW Radar Array): Operational status 100% encrypted.
- Sector Bravo (Air Defence Early Warning Grid): Post-quantum key rollover active.
- Sector Charlie (Strategic Command Fiber Link): Tamper-evident optical telemetry engaged.

5. ENFORCEMENT & COMPLIANCE:

Any leak shall result in immediate cryptographic attribution, court-martial proceedings, and permanent revocation of national security clearances under the Official Secrets Act.

AUTHORIZING SIGNATORY:

Vice Admiral S. K. Mehta, PVSM, AVSM

Deputy Chief of Integrated Defence Staff (Policy, Planning & Force Development)
